

Dr. Georgios Dimakis

Special Interest in Periodontics and Implant Dentistry

GDC: 226434

Dr Georgios Dimakis has enormous experience in treating periodontal cases and works with a special interest in periodontics which he has developed with a three year course in specialist Periodontics at the Gothenburg University in Specialist Periodontology (SPA). While at Gothenburg he studied under Professor Dr Lindhe, Prof. Jan Wennstrom and Prof. Tord Berglundh.

Further to his periodontal qualifications George attained a certificate degree in Oral Biology and undertook extensive training in the use of dental implants and reconstructive surgery. This included studying in the Branemark clinic with surgical instructors Prof. Lars Sennerby, Prof Ulf Lekholm and prosthetic reconstruction instructor Prof. Torsten Jemt, and at SPA clinic in the use of the Astra and Straumann implant systems with instructors Prof. Lindhe, Prof. Wennstrom and Prof. Berglundh. His implant experience extends to being clinical implant advisor in Greece and Cyprus for Xive Densply Implants and TBR.

His extensive practical experience extends to 12 years of clinical dentistry in his two private specialist clinics in Athens. George enjoys applying periodontal and implant facets with different dental specialisms including prosthodontic, oral surgery, endodontic and orthodontic treatment.
